- Our school is a public primary school located in Warsaw, Poland. We provide education for approximately 1000 students, guided by a dedicated team of 100 teachers. We cater to students aged 7-14 and offer both early education (Grades 1-3) and subject-based education (Grades 4-8).

Educational Approach

- We emphasize language education, interdisciplinary learning, and ICT integration in teaching. Our curriculum fosters critical thinking, creativity, teamwork, and social skills. We incorporate project-based learning and innovative methodologies to enhance engagement, problem-solving, and communication.
- Each year, we host a **Foreign Language Day**, where older students lead workshops in different languages, and an **Earth Day** with hands-on environmental activities. The school year begins with a **Project Week**, encouraging collaboration and research through interdisciplinary projects.

Supporting Diversity

- We recognize and celebrate student diversity by providing individual learning paths and special adjustments. Students receive tailored support based on their needs, including additional language assistance, personalized learning plans, and inclusive teaching methods.

Holistic Learning

- Our school-wide activities promote cross-curricular learning and soft skills development. Students participate in team-based projects, leadership training, and problem-solving exercises. We believe that collaboration and creativity are essential for academic and personal success.

International Collaboration

- As an internationally active school, we participate in Erasmus+ and Visegrad Fund projects, eTwinning partnerships, and teacher exchange programs. These initiatives allow our students and staff to experience different cultures and teaching methodologies.

Erasmus+ Achievements

- In 2024, we were honored with the 'EduInspiration' award from the National Erasmus+ Agency in the ecological category. This recognition highlights our commitment to sustainability and environmental education in our projects.

Student Development

- We offer a wide range of extracurricular activities, including:
 - Art, music, and school TV groups
 - Science and ICT clubs
 - Sports teams and competitions
 - Debate and language workshops
 - Library clubs and reading circles
 - Student Council and Erasmus+ group
 - Volunteer initiatives and community service projects
- These programs help students develop their talents, confidence, leadership, and social responsibility, while also fostering teamwork, creativity, and a sense of global citizenship."
